

STATUS	POLICY	POLICY AREA	POLICY CATEGORY	YEAR ENACTED
 Not Enacted	<b>Residential Energy Codes</b> Residential energy codes are statewide building codes that dictate the energy performance requirements of newly constructed residential buildings.	Buildings and Efficiency	Building Codes	
	<b>Commercial Energy Codes</b> Commercial energy codes are statewide building codes that dictate the energy performance requirements of newly constructed commercial buildings.			
	<b>Stretch Building Energy Codes</b> Stretch building energy codes are an optional, more stringent building code established by the state that local jurisdictions can adopt to require that newly constructed buildings are more efficient than the baseline state codes.			
	 Enacted	<b>Appliance Standards</b> The state's Appliance and Equipment Efficiency Standards currently apply to 14 products. Establishing Policies <ul style="list-style-type: none"><li>A.R.S. 44-1375 (2009)</li></ul>	Buildings and Efficiency	
 Not Enacted	<b>Building Performance Standards</b> Building performance standards establish energy and/or greenhouse gas performance targets for existing buildings in a state. These targets increase in stringency over time, leading to efficiency improvements in buildings to conserve energy and reduce emissions.			

STATUS	POLICY	POLICY AREA	POLICY CATEGORY	YEAR ENACTED
 Not Enacted	<b>Clean Heat Standards</b>  Clean heat standards establish a performance standard requiring heat providers to deliver a gradually-increasing percentage of low-emission heating services to customers.	Buildings and Efficiency	Building Standards	
 Enacted	<b>Energy Efficiency Resource Standards (EERS)</b>  Electric utilities are required to achieve annual 1.3% energy savings for 2023-2025, and a 35% reduction in 2020 peak demand by 2030.  Gas utilities are not subject to an EERS.  Establishing Policies <ul style="list-style-type: none"> <li>• <a href="#">Docket E-00000V-19-0034 (2022)</a></li> </ul>	Buildings and Efficiency	Building Efficiency	2022
 Not Enacted	<b>Property Assessed Clean Energy (PACE)</b>  Property assessed clean energy (PACE) allows residential and/or commercial property owners to finance efficiency upgrades with loans tied to the property.	Buildings and Efficiency	Building Efficiency

### Weatherization Funding

Partially  
Enacted

The State Policy Opportunity Tracker (SPOT) breaks clean energy policies down into “components”, which are binary questions to evaluate policy quality. Higher quality policies have more of their SPOT components fulfilled.

**Building  
Efficiency**

### All-Electric Buildings

Not  
Enacted

All-electric buildings policies require new buildings to be constructed with all-electric heating, cooling, and cooking systems to transition away from fossil-fuel use in buildings.
